SLEEPKNIT® SMART SHEETS

Colours & Patterns

CREAM (C)

WHITE (W)

Features & Benefits

MIP's SleepKnit Smart Sheets are 4-way knitted sheets with multi-directional stretch, offering greater flexibility than conventional woven sheets when fitting a wide range of healthcare mattresses, from standard profiling beds to dynamic air airflow and pressure care mattresses.

? Fitted knitted design supports faster bed-making and sheet stays in place, reducing remakes for staff versus flat woven sheets
? Stretch properties create a smooth, wrinkle-free surface that helps reduce pressure injury risk
? Lightweight construction allows for quick-drying and requires no ironing or folding, reducing processing time, energy and water use in the laundering process.
? Plated knit design: soft cotton surface against the patient with a durable, stretchy polyester underside
? Elastic-free, smart style closure supports a longer product life as well as fitting a wide range of healthcare mattresses including dynamic airflow and pressure care mattresses
? Low shrinkage and strong stain release properties
? Suitable for thermal disinfection and high-demand healthcare environments

This item is bagged for both Cream & White and un-bagged for White only.
