Features & Benefits

Cromptons Healthcare by MIP Slide Sheets are made from Transtex, a specially developed fabric that is silicone coated on both sides to provide a slick, low friction finish for easy patient movement and turning.

The **Ready-to-Go Slide Sheet** pack made from this lightweight fabric are designed to accompany the patient during their stay in hospital and then disposed of when the patient has no further use of them. Not intended for laundering. Lightly soiled sheets may be wiped clean using a dilute chlorine based solution or a good quality sterilisation fluid.

Slide sheets are not intended for lifting, and all patient manoeuvres should be accomplished without lifting.

Flat Slide Sheets are used in pairs to offer multi-directional movement, the Flat Slide Sheets are full body-length sheets and can be used as a pair back to back.

The **Ready-to-Go Slide Sheet** pack comes with the option with, or without handles. Featuring handles along the full lengths of three sides for a positive grip and safe patient movement. The handles are attached with flag style stitch patterns to provide a strong secure product for both patient and carer. The handles running along the short edge enables carers to provide additional support to the patients head during repositioning manoeuvres.
