

COMING SOON: EDGE BY MIP® POSITIONING WEDGE

Features & Benefits

Coming Soon!

Designed to support safer, more effective patient positioning, the Edge Positioning Wedge features a fluid-proof PVC shell and welded seams which provide a protective barrier against fluid ingress to the foam core. The zip closure, protected by a PVC flap, provides protection against splashes and incidental fluid contact during normal use. Available in three sizes to suit a wide range of positioning applications.

Please Note estimated delivery is November 2026.
