FLAT PATIENT SPECIFIC SLIDE SHEET – NO HANDLES

Patient Specific Flat

Patient Specific Flat 2

Features & Benefits

Cromptons Healthcare by MIP Slide Sheets are made from a Transtex, a specially developed fabric that is silicone coated on both sides to provide a slick, low friction finish for easy patient movement and turning.

Patient Specific Slide Sheets are made from Transtex fabric and are red in colour. Slide Sheets made from this lightweight fabric are designed to accompany the patient during their stay in hospital and then disposed of when the patient has no further use of them. Not intended for laundering. Lightly soiled sheets may be wiped clean using a dilute chlorine based solution or a good quality sterilisation fluid.

Slide sheets are not intended for lifting, and all patient manoeuvers should be accomplished without lifting.

Flat Slide Sheets are used in pairs to offer multi-directional movement, the Flat Slide Sheets (no handles) are full body-length sheets and can be used as a pair back to back or as a single sheet folded in half.

For all repositioning and manual handling solutions it is recommended to seek advice / approval from a manual handling expert.

*STA = Subject to availability

Available to purchase through NHS Supply Chain here.
