TUBULAR PATIENT SPECIFIC SLIDE SHEETS

Patient Specific Tubular Flat

Features & Benefits

Cromptons Healthcare by MIP Slide Sheets are made from Transtex, a specially developed fabric that is silicone coated on both sides to provide a slick, low friction finish for easy patient movement and turning.

Patient Specific Slide Sheets are red in colour. Slide Sheets made from this lightweight fabric are designed to accompany the patient during their stay in hospital and then disposed of when the patient has no further use of them. Not intended for laundering. Lightly soiled sheets may be wiped clean using a dilute chlorine based solution or a good quality sterilisation fluid.

Slide sheets are not intended for lifting, and all patient manoeuvers should be accomplished without lifting.

Tubular Slide Sheets are formed by sewing the fabric into a continuous tube with a double sewn low profile seam that reduces potential tissue viability issues whilst adding strength and durability.

A web hanging loop is provided to allow the tube to be kept with the patient at all times.

For all repositioning and manual handling solutions it is recommended to seek advice / approval from a manual handling expert.

CE and CA Marked

Tubular Patient Specific Slide Sheets are available to purchase through NHS Supply Chain:

- PST8585
- PST200100
