Features & Benefits

Cromptons Healthcare by MIP Poly-glide Slide Sheet is a Patient Specific Slide Sheet. It is produced in tough polypropylene with a low friction polyurethane coating to provide easy patient repositioning or transfer.

The Poly-glide is a universal sheet suited to all healthcare departments and could be included within an infection control strategy to assist in combating MRSA and other infectious bacteria, helping to create a more hygienic and safer environment for patients.

Poly-glide Flat Slide Sheets can be used as a pair back-to-back or as a single sheet folded in half to provide multi-directional movement for seated or supine patients and avoid the need for manual patient lifting.

The Poly-glide carton contains 100 slide sheets and acts as a neat convenient dispenser. Simply open the box and the Poly-glide slides are ready to be dispensed.

For all repositioning and manual handling solutions it is recommended to seek advice / approval from a manual handling expert.

CE and CA Marked

Available to purchase through NHS Supply Chain here.
