 **CROMPTONS**  
HEALTHCARE by **MIP**

## About MIP

Providing effective, affordable, quality care requires the right people and the right supplies, at the right time. Our customers face challenges specific to their unique environments, which may require customised solutions for their personalised needs. At MIP, we are dedicated to supplying each customer with healthcare textile and related solutions that answer those specific situations and requirements. We work tirelessly with you to make sure your needs are met and the highest quality of care is delivered.

**Acute Care**

**Long Term Care**

**Laundry**

- Acute Care - Our textiles and related solutions provide you, your staff and, most importantly, your patients with the quality, comfort and reliability they deserve.
- Long Term Care - We work with our distributors to offer quality resident care solutions whilst improving process and efficiencies.
- Laundry - Our goal is to supply you with high quality, cost effective healthcare textile solutions that add value to your business and improve operational efficiencies.

## MIP Timeline

**1977** MIP (previously known as Med-I-Pant) was founded by Jerry Friedman in Canada

**1981** First sale in the USA

**1982** First sale in the European Union

**1986** Acquired SleepKnit & Patented bedding system

**2006** Established Changshu Welland Textiles Co Ltd in China

**2005** Swift UltraslideSystem was Launched Canada & USA)

**2004** Acquired Löning Hospitex GmbH in Germany

**1992** Opened office in the UK

**2013** Banyan Capital Partners Invested in MIP Inc.

**2016** MIP acquires Cromptons Healthcare

**2017** MIP celebrates 40 years

**2018** Cromptons Healthcare products are integrated into the MIP portfolio

## Confidence in MIP

At MIP we strive to manufacture only the highest quality products and are proud that we have a name synonymous with quality in such a competitive industry. Any product that leaves our UK warehouse should be fit for purpose and as such we have worked hard to achieve and maintain recognised standards that reflect this. We aim to provide defect free goods and services to our customers on time and within budget.

**Our quality policy**

**Our ethical policy**

**LSAS Level 4 Accredited**  
– highest level  
achieved on the NHS  
Management System

**CE Mark**  
- on applicable  
products

## Mobility Scale

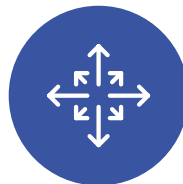

The mobility scale in this brochure will help identify the types of tasks for which each product is appropriate and its recommended use.

**Turning**

**Boosting**

**Repositioning**

**Transfer**

**Lie to sit**

**Sit to stand**

**Bariatric  
application**

**Dressing  
assistance**

**Pressure  
injury  
prevention**

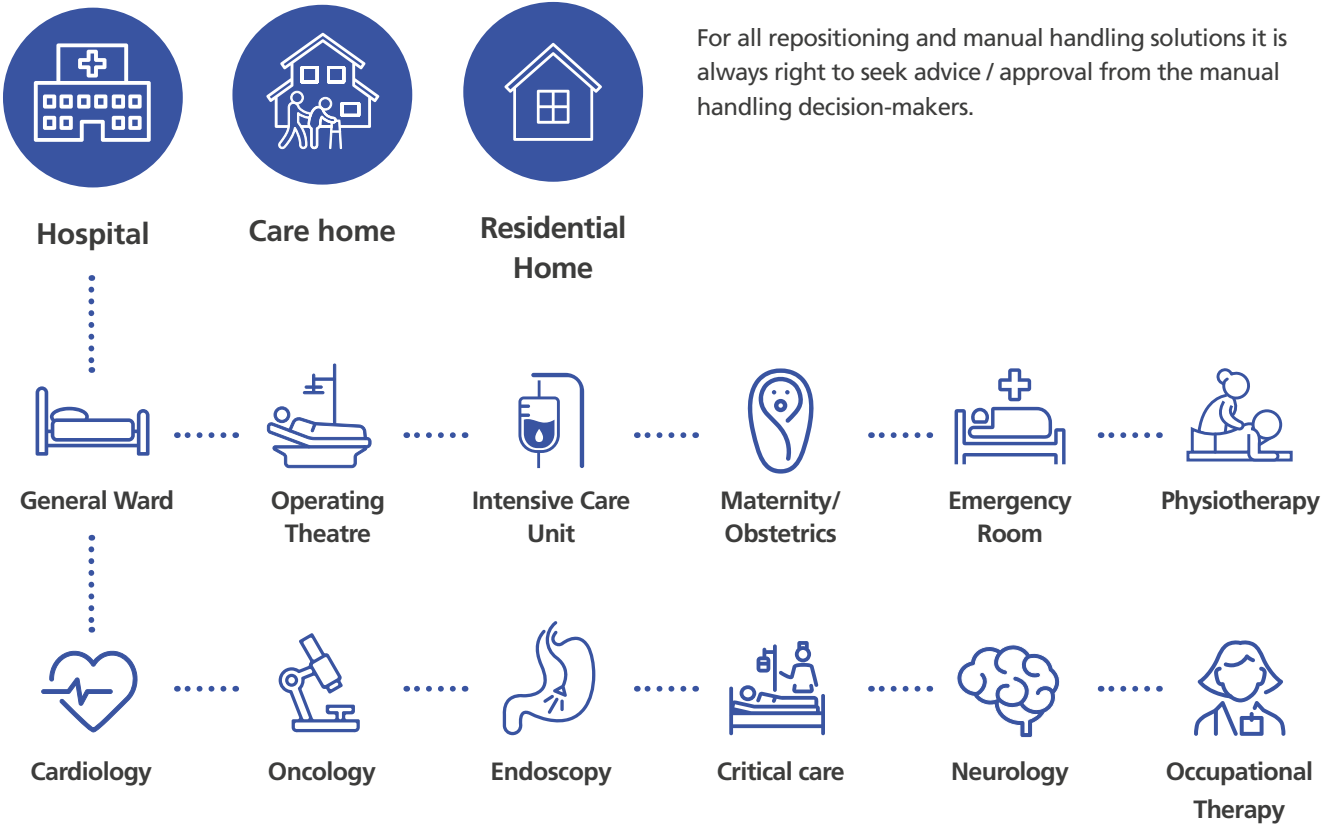

**Sling  
insertion**

For all repositioning and manual handling solutions it is always right to seek advice / approval from the manual handling decision-makers.

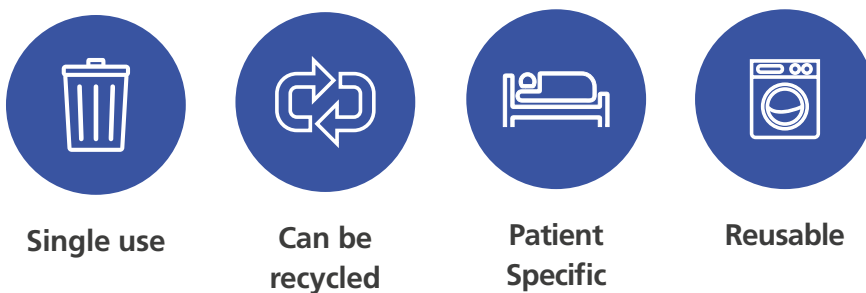

## Care Continuum

This tool is designed to provide a quick glimpse into the recommended and suggested areas for use of each of our solutions within the hospital, senior living, and home care environment.

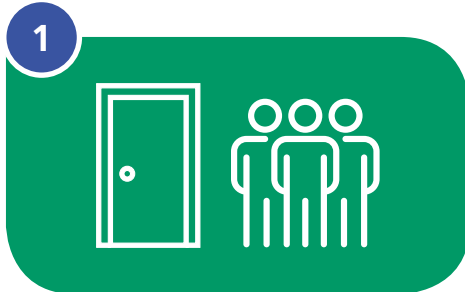

## Product Usage

MIP's range of Repositioning and Manual Handling Solutions are designed with different usage requirements in mind, from single use, to reusable, our handy icons will help you identify the usage needs. For detailed instructions on specific products, please contact MIP direct.

- Patient Specific – intended to accompany patients during their stay in hospital / care facilities and be disposed of when the patient has no further use for them.
- Reusable – All reusable products can be laundered following standard hospital laundry guidelines HSG(95)18.

# Swift

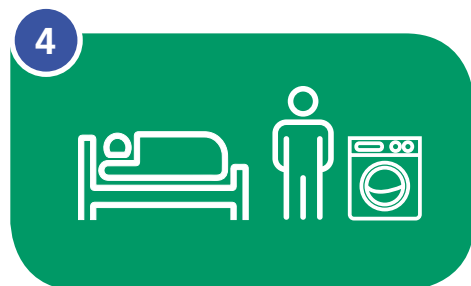

In 2004, MIP was approached by a reputed Occupational Therapist in Canada to develop a patient repositioning system that would assist with the reduction of musculoskeletal injuries.

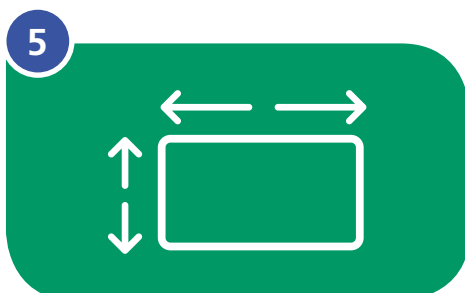

Having just introduced an extensive array of high end, expensive repositioning tools, yet still seeing little reduction in injuries, it became clear that staff were simply not using what had been implemented.

The available tools were cumbersome, difficult to use, time consuming, and inconvenient to their daily tasks.

The goal became to create a repositioning device that could stay on the bed at all times, benefit the patient/resident's overall care, be laundered just like the rest of the linen with no special care or handling and reduce the overall cost of injuries.

And so came the development of the Swift Slider...

One year after its implementation the cost of injuries and lost work days plummeted by approximately 50%.

# Swift®

MIP recognises that manual repositioning exposes caregivers to increased risk of neck, shoulder, and back injuries. That's why we have developed Swift®, a cost-effective, low-friction repositioning system intended to allow caregivers to safely and easily perform manual handling tasks with little physical strain.

## Product Benefits

Increase compliance, improve patient comfort

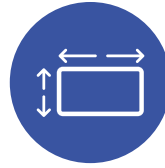

Works with pressure redistribution mattresses

More time for care activities

## The range includes

Swift® Slider

UltraSlide® Bottom Sheet

Swift® UltraSlide® System

COMING SOON	4 Way Swift® Slider Extra Long	White with Blue low friction backing. W183cm x L200cm

# Swift® Slider

The Swift® Slider is a friction reducing device that remains in-situ to assist with patient/resident repositioning, boosting and turning in bed. Made with a breathable, low-friction backing it allows staff to reposition patients/residents safely and easily whilst avoiding heat build up under the patient/resident.

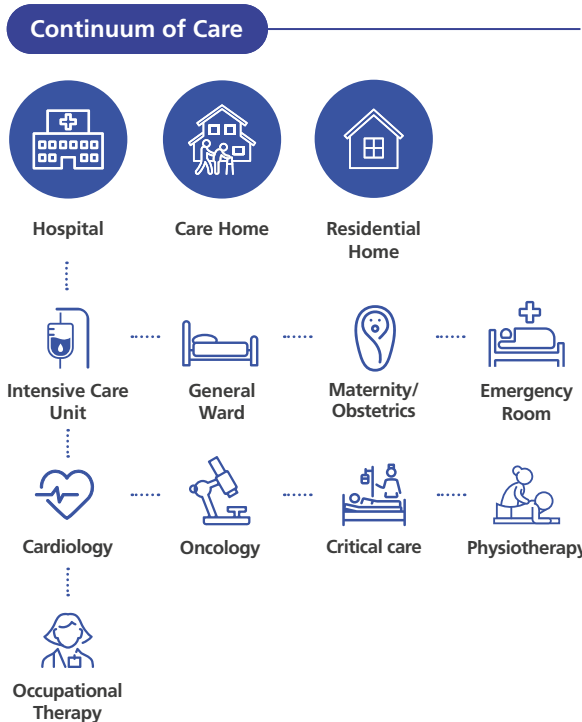

# Swift® UltraSlide® System (Swift® Slider + UltraSlide® Bottom Sheet)

The Swift® UltraSlide® System uses the UltraSlide® Bottom Sheet in conjunction with the Swift® Slider for use with more dependent patients/residents who have little or no mobility and require extensive or total assistance for repositioning.

The UltraSlide® Bottom Sheet is designed using MIP's patented Smart Sheet design with an integrated low-friction panel down the centre.

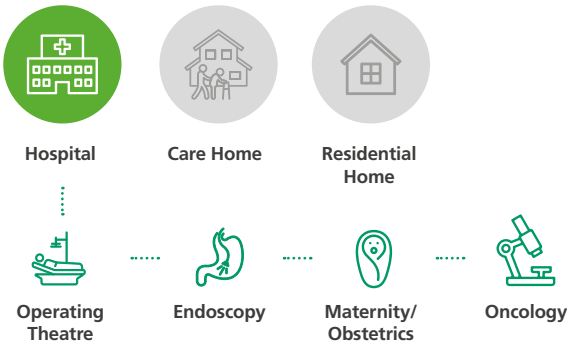

# JC100 Transfer Sheet

JC100 transfer sheet is ideal for fast moving patient areas such as theaters and A & E.

Whilst the JC100 is designed to be disposed of after use, the superior construction allows this product to be fully recycled, reducing the impact of waste on hospitals.

## Continuum of Care

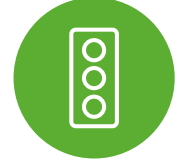

## Product Benefits

Used for: Lateral Transfers

Made using strong water repellent, non woven PP (Spunbond)

Ergonomic handles cut in to facilitate firm grip
