

# SleepKnit™ SmartSheet

The fitted knitted bottom sheet with 4-way stretch that always delivers

The SleepKnit SmartSheet is a 4-way fitted knitted bottom sheet from MIP, designed for healthcare beds with the needs of both patient and carer in mind

## Why our customers love our SleepKnit SmartSheet:

- Fitting is quick and easy
- Latex free & contains no elastic
- The stretch and large overlay ensures it fits most mattresses including profiling & pressure reducing
- Doesn't require folding or ironing
- Once fitted, it becomes crease free, corners remain intact & it does not ruck like conventional sheets, improving comfort & reducing the number of times the bed needs to be tucked in or remade
- Unlike standard bedding, the 4-way stretch of the SleepKnit Smartsheet won't allow the sliding or repositioning of a patient, prompting the use of slide sheets, and equipment designed for the task in hand.
